Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Ellsworth et al. (US 5,749,822).

Ellsworth et al. disclose an apparatus for forming a pleat comprising first and second creasing components 56 and 66; third creasing component 73; see figure 2. Third creasing component is positioned between and on the other side of the flexible product to be pleated than first and second components 56 and 66. The material is either driven intermittently or continuously by an arrangement. The distance between the first and second creasing components decreases as the pleat is formed then transferred to nip/compressing rollers 23 and 24 (ie. direction movement of folders/material).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ellsworth et al. (US 5,749,822) in view of Smithe et al. (US 6,210,309).

Ellsworth does not directly disclose a conveyor for moving the folder with a plow, however Smithe et al. teach a folder with plow 60 and conveyor 12. It would have been obvious to one of ordinary skill in the art at the time the invention was made to include the conveyor and plow folder of Smithe in order to deliver a flexible connector folder blank to be pleated.

5. Alternatively, claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smithe et al. (US 6,210,309) in view of Ellsworth et al. (US 5,749,822)

Smithe does not disclose pleating a connecting portion of the folder, however Ellsworth teaches a three component pleating device; see above. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the pleating device of Ellsworth in the invention to Smithe et al. for pleating the bottom connected portion of folders.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
